Forecast for Monday 22 May 2023

Weather: Any early morning valley mist soon clearing to leave a dry morning with plenty of sunshine. Some fair-weather cloud bubbling up by the end of the morning and this may give some cloudier spells during the afternoon. There's a low chance of a rogue shower developing later in the day, but the vast majority of the area will remain dry. Feeling warm in the sunshine but a little cooler across summits where there will be a noticeably brisk northerly breeze.

Chance of cloud-free hill tops above 600m: 90% or more throughout.

Low cloud and visibility: Periods of cloud during the afternoon but bases will remain comfortably above summits. Locally poor visibility in any dawn mist patches otherwise very good visibilities with distant hills and landmarks clear to see.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite feeling a little cool in the breeze across summits, the sun is very strong and there will be high or very high UV levels. It's important to protect your skin from the harmful UV rays and stay hydrated if spending the day in the hills.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 22 May 2023	0mm	0mm	0mm

Forecast for Tuesday 23 May 2023

Weather: A locally chilly start to the morning but soon warming up with some hazy sunshine. Remaining dry throughout the day albeit somewhat cloudier than recent days. Not feeling quite as warm due to cloudier skies, but winds will be lighter.

Maximum wind: Northerly 10-15 mph.

Chance of cloud-free hill tops 600m: 90% or more throughout.

Low cloud and visibility: A few scraps of cloud at around 500-600m on north facing slopes at first, otherwise cloud free with clouds above the summits. Generally very good visibilities.

Temperature: **Valleys:** Plus 4 Celsius rising to plus 20 Celsius.
At 600m: Plus 8 Celsius rising to plus 14 Celsius.
Freezing level: Well above the summits.
